

TOURNAMENT GAME SYSTEM AND METHOD USING A TOURNAMENT GAME CARD

5

ABSTRACT OF THE DISCLOSURE

In an embodiment of a gaming method, an identifier may be received from a first gaming unit, wherein the identifier is associated with a tournament game card, wherein the tournament game card is provided to a player in response to paying a fee. Whether the identifier received from the first gaming unit is authentic may be
10 determined. A duration the player may play in a tournament may be determined based on the identifier, and the first gaming unit may be enabled for play in the tournament for the duration if the identifier is authentic. A tournament score of the player may be received, and a winning player of the tournament, if any, may be determined. Data indicative of a value payout to be awarded to the winning player
15 may be generated if the winning player of the tournament is determined.
